

INTER-OFFICE-MEMO

Ref. No. : DAL-DED-IOM-PM-04

Date : 14 September 2026

FROM : Ichizuru ISHITOMO, Project Manager
TO : Mr. Katsumata, TL of Electro-Mechanical (EM) Team
COPY TO (Cover only) : O&M Team
 Office File
SUBJECT : Request for Clarifications for Necessary Input from OM Team

As explained by Mr. Tsuboi, sub-TL of O&M Team, during the last biweekly meeting on September 4, 2026, there exists several design condition issues to be coordinated between EM team and OM team. From OM Team, the following design conditions issues to be considered in EM design:

No.	O&M Planning (by OM Team)			Electromechanical Design (by DED Team)
1	Toll Road Planning			Optical Communication System Design (Area Coverage of Optical Communication Network)
2	Traffic Monitoring and Information Provision Planning	Traffic Monitoring Plan	Area Coverage of CCTV Cameras	CCTV Camera System Design (Location and Quantity of Cameras)
3		Environmental Monitoring Plan	Environmental Parameters to Be Monitored	Environmental Monitoring Device System Design (Necessity, Type, Location, and Quantity)
4		Incident Detection Plan	Area Coverage and Incident Types to Be Automatically Detected by VIDS (Video Incident Detection System)	VIDS (Video Incident Detection System) Design (Necessity, Coverage Area, and Incident Types to Be Detected)
5		Information Provision Plan	Location and Displayed Information of VMS	VMS System Design (Location, Signboard Size, and Quantity)
6		Traffic Control Plan	Road Closure Strategy (Conditions and Procedures for Road Closure, Actions Taken When Road Closed)	Meteorological Observation System Design (Observed Items e.g. Rainfall, Visibility, etc.)
7			Variable Speed Limit Strategy	Variable Speed Limit Sign Design (Location and Quantity)
8	Operation Planning	Information Sharing Strategy with Relevant Agencies	Information Sharing Strategy (Agencies and Information to Be Shared)	Information Sharing System Design (CCTV Live Video, VMS Display, Traffic Information (Road Closure, etc.))
9	Emergency Response Planning	Emergency Call Destination		Emergency Telephone System Design
10		Emergency Telephone Coverage on Non-Tunnel Sections		Emergency Telephone System Design
11		Emergency Button Notification Destination		Emergency Push Button System Design
12		Fire Detector Notification Destination		Fire Detection System Design
13		Method for Identifying Incident Locations		Tunnel Safety System Design (Automatic Incident Location Identification)
14		Safety System Auto-Activation Sequence After Incident Detection		Tunnel Safety System Design (Safety System Auto-Activation Sequence)
15		Jet Fan Operation Strategy		Jet Fan Control System Design
16		Tunnel Lighting Operation Strategy		Tunnel Lighting Control System Design

No.	O&M Planning (by OM Team)			➡ Electromechanical Design (by DED Team)
17	Emergency Response Planning (Cont'd)		Tunnel Interior Traffic Signal Control Strategy	Traffic Signal System Design
18			Method of Providing Information to Drivers Inside Tunnels	Radio Re-broadcasting System Design, Tunnel Public Address System Design
19			Emergency Response Staging Area Plan (Locaton and Size)	Wireless Communication System Design (Location of Wireless Device Connection Box)
20			Emergency Services Vehicle and Personnel Deployment Plan	Wireless Communication System Design (Area Coverage)
21	Traffic Enforcement Planning		Target Vehicles Subject to Enforcement	Weigh-In-Motion System Design (Necessity and Location)
22			Enforcement Location	
23			Enforcement Measures	
24			Actions for Detected Violations	
25	Facility Operation Management Planning		OCC Room Equipment and Desk Layout (Video Wall and Operator Consoles)	OCC System Design
26			OCC Room Video Wall Information Layout	OCC System Design
27	Communication Infrastructure Planning		Method of Hotline (Call to 911 Center)	Telephone System Design of OCC Building (if necessary)
28			Wireless Communication Strategy (User Agencies and Coverage Areas)	Wireless Communication System Design (Wireless Frequency and Area Coverage)
29			Tunnel Firefighting Water Supply Continuity Requirements	Tunnel Firefighting System Design (Necessity of Backup Water Supply, etc.)
30	Security Planning		Cyber Security Levels	Internet Connection Design for Each Building (if necessary)
31	Utilities Requirements Planning		Power Supply Continuity Requirements	Emergency Generator Design (Fuel Tank Capacity, etc.)
32			Tunnel Firefighting Water Supply Continuity Requirements	Tunnel Firefighting System Design (Necessity of Backup Water Supply, etc.)

It is requested EM team to clarify the necessity of design conditions input from OM team using the similar table format (add rows as needed):

No.	Works	Facility/Equipment	Input Needed from OMT	Timing of Input
1	Electrical			
2	Mechanical			
3	ICT			
4	Others			

It should be noted that this clarification will be evidence of mobilization timing of OM Team when we will request DPWH to mobilize OM team in timely manner.

Your clarification should be not later than September 18, 2026. If you need any clarification on this instruction, please contact without any hesitation.

Thank you.

Ichizuru ISHIMOTO

Project Manager
