

DIGITAL CORRESPONDENCE CIRCULATION SYSTEM

SYSTEM WORKFLOW

PHASE 1: DOCUMENT RECEIVING AND SENDING

Step 1: Document Receipt

- The system receives documents from external/internal sources such as:
 - DPWH
 - Design Team (Internal Memo)
 - JV Members
 - AA / Partner Agencies
-

Step 2: Admin Intake

- The DPEARP Admin and Secretary Team receive the physical or digital document.
 - They verify and log the document for processing.
-

Step 3: Scanning and Encoding

- The document is scanned and uploaded into the system.
 - The following details are encoded:
 - Subject / Title
 - Date received
 - Document type
 - Remarks / reference number (if applicable)
-

Step 4: Recipient Selection

- The PM / DPM / Co-PM selects intended recipients via checkbox selection in the system.

- Multiple recipients can be selected depending on document distribution requirements.
-

Step 5: Submission and Notification

- Upon clicking **Submit**, the system:
 - Stores the circulation record
 - Sends notifications to selected recipients (email/system alert)
-

PHASE 2: DOCUMENT RECEIPT AND MONITORING

Step 6: Notification Delivery

- Selected recipients receive an email/system notification indicating:
 - A new document has been assigned to them
 - Access instructions are provided
-

Step 7: Secure Access Login

- The recipient logs in to the Digital Correspondence Circulation System.
 - The system requires a **Unique PIN Code** to access the document.
 - PIN validation ensures secure and authorized document viewing.
-

Step 8: Acknowledgement and Tracking

- Once the correct PIN is entered:
 - The document becomes accessible to the recipient
 - The system automatically updates the status as **“Received”**
 - The sender (Admin/PM/DPM/Co-PM) is notified that the document has been successfully accessed
-

END-TO-END FLOW SUMMARY

Document Received → Admin Encoding → Upload → Recipient Selection → Submission → Notification Sent → Recipient Login → PIN Verification → Document Access → Receipt Confirmation Notification
